Vision

Six year ago (2014), I thought of reshaping my life/work approach and selected 3 focus areas to work on :Energy, Environment and Electronics: (3E’s) along with a philanthropical approach through foundation.

Identified Scientists/Technologies which will be helpful to mankind, Nurtured/funded Ideas and helped scientist to commercialize the technologies.

Inspired by Melinda Gates foundation and Bill gates donation of 95% of income for upliftment of mankind, I changed name spelling from Milind to Melind and set a goal for earning more money to donate more.

In the journey started conceptualizing Models which will make NGO independent of donation rather activity to be self-sufficient from generation of revenue from commercial means.

Summary

- Worked/working with More than 15 companies in capacity of Director / CMO / CEO / Advisor for past 20+ years.
